Group	No. of up reg genes	No. of down reg genes
1	21	34
2	74	50
3	83	119
4	0	0
5	10	29
6	410	272
7	5	57

**C PAX2 binding on TSS of 500 non-reg genes**

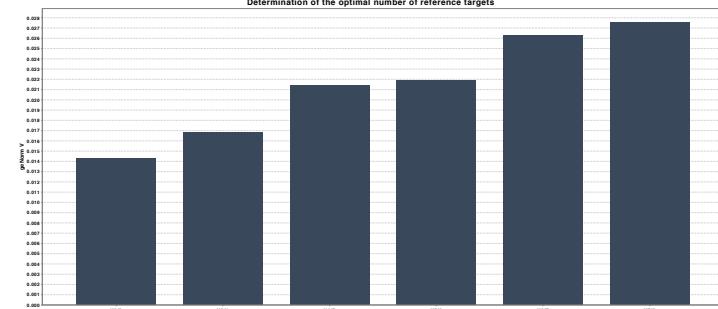

# Supplementary Figure 7

## A geNORM analysis of 8 reference genes in treatments of GRO-seq

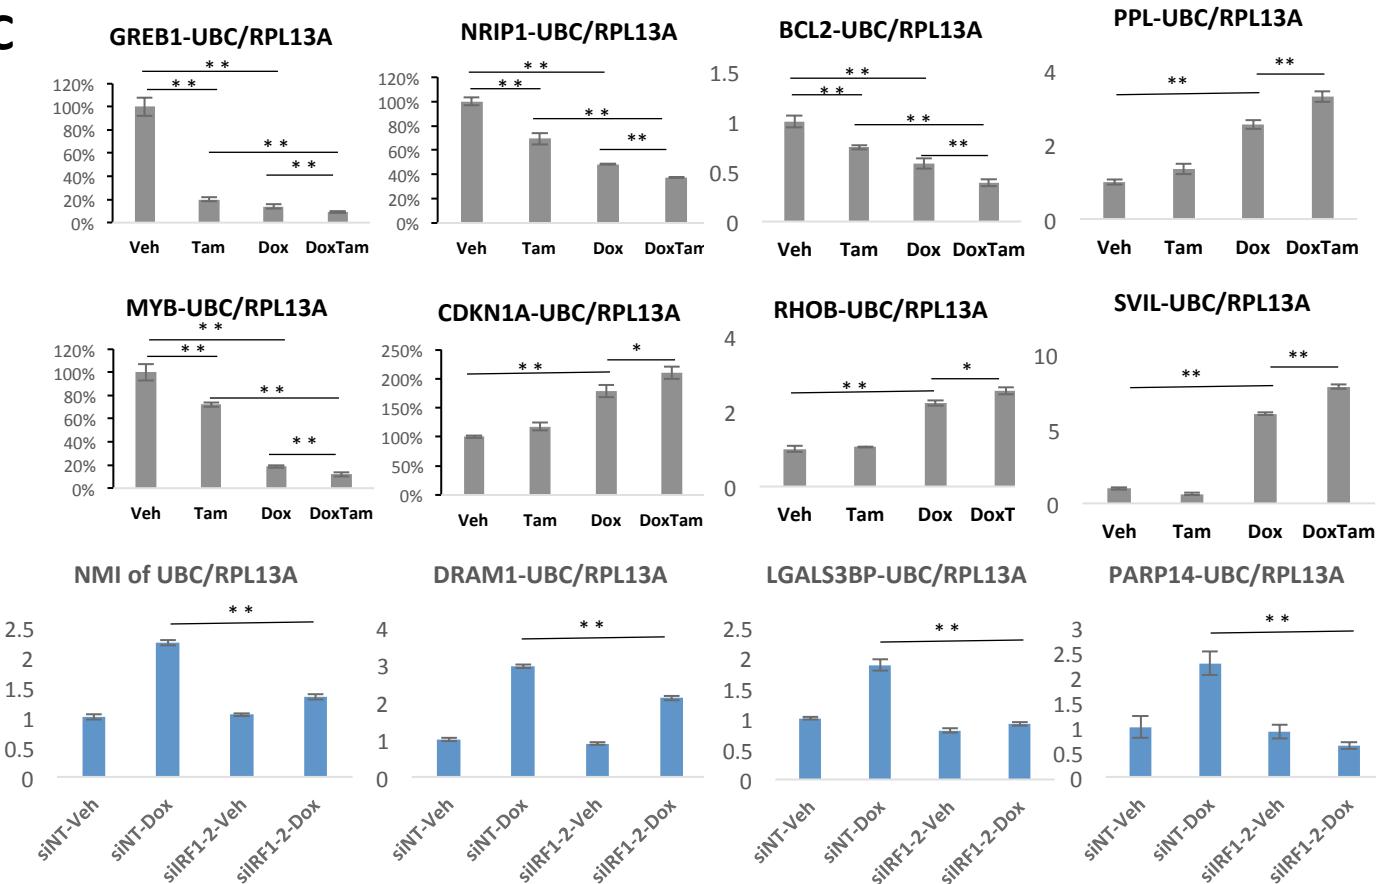

B

### Optimal reference target selection

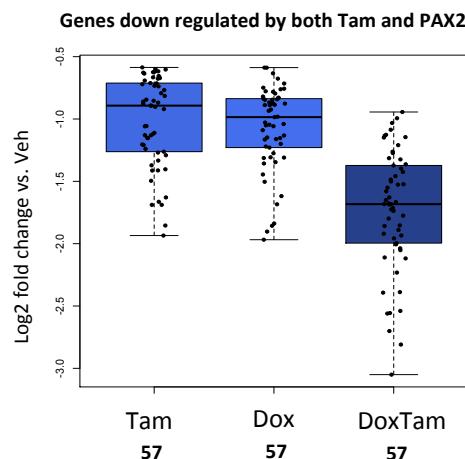

The optimal number of reference targets in this experimental situation is 2 (geNorm  $V < 0.15$  when comparing a normalization factor based on the 2 or 3 most stable targets). As such, the optimal normalization factor can be calculated as the geometric mean of reference targets RPL13A and UBC.
