+ Number of patients included at the initiation of the study, i.e. with first clinical manifestation <5 years old

* AT: Armand-Trousseau; PS: Pité-salpétrière; GCH: Gesù Children's Hospital; CLC: Clínica Las Condes; RR: Hospital Roberto del Río; LCM: Hospital Luis Calvo Mackenna;

Supplementary Table 2: Variables that were captured for each patient to populate the clinical data sheet:

| | |
|--|---|
| Demographic information: | Gender, date of birth, country of origin, referring center and clinician, country where attending neuromuscular clinic, date of last visit, date of death if applicable |
| <i>LMNA</i> mutation characteristics | DNA, amino acids modifications, Exon |
| Circumstances of onset | Age and symptom(s) of onset |
| CK level | Maximal CK levels reached |
| Muscle biopsy main characteristics | Age at the biopsy, biopsied muscle, presence or absence of dystrophy, inflammation or other particular findings |
| Motor achievements | Ages of acquiring and losing of major motor milestones (Sitting, crawling, walking supported, walking unsupported and running) |
| Orthopedic features if applicable | Affected joints and age of onset of joint contractures and scoliosis, |
| Orthopedic interventions* if applicable | Age of joint contractures and scoliosis non-surgical and surgery treatments |
| Respiratory interventions* if applicable | Age of Intermittent positive pressure breathing, non-invasive ventilation, tracheostomy) |
| Cardiac abnormalities* if applicable | Age at onset of cardiac abnormalities (P-wave flattening, Arrhythmias, conduction defect, echocardiographic abnormalities) |
| Cardiac interventions* if applicable | Age of first heart specific drugs, pacemaker and implantable cardioverter defibrillator (ICD) |
| Corticosteroids usage if applicable | Age at starting and arrest, type of steroid |
| Gastrointestinal features and intervention* if applicable. | Age of any nutritional, feeding, metabolic abnormalities, gastrostomy feeding tube |

*For the definition of cardiac abnormalities and cardiac, gastroenteric, orthopedic and respiratory interventions, see material and methods section.
