

Table S5 Effects on the levels of B vitamin concentrations

CI – Confidence Interval; NR – Not Reported; SD – Standard Deviation. * In few publications for folate level, the unit reported was in nmol/L and for Vitamin B12 pmol/L. Therefore, for maintaining the consistency the values were converted in ng/mL and pg/mL for folate and Vitamin B12 respectively. Those results are indicated with (*).

Author and year	Intervention/comparator	n	Time point	B vitamin concentrations	% change to baseline	p-value
Folate level (ng/mL)
