

1 **S2 Table. Interruption or discontinuation of fingolimod per year.**

	Year 1	Year 2	Year 3	Year 4	Total
	N (%)				
Temporary interruption	22 (3.8)	19 (4.2)	11 (3.6)	3 (1.6)	43 (6.5)
Discontinuation	35 (6.1)	42 (9.3)	43 (14.1)	24 (12.9)	106 (15.9)

2 *Note:* if a patient had several temporary interruptions during the study follow-up, each temporary
3 interruption was included at each visit. Similarly, discontinuation was registered as 'permanent
4 discontinuation' since the first time it was registered onwards. For these reasons, the sum of the number of
5 temporary interruptions and discontinuation at each visit (year 1, year 2, year 3, year 4) does not
6 corresponds to the number of total temporary interruptions and discontinuation reported on the right
7 column (total).
