

Table S5. Comparison between individual performance improvements and clinical effect between intervention

	Performance ^a		Clinical effect ^b	
	Better after intervention	Not improved	Better after intervention	Worse after intervention
KAD_SCL_01®	73.33% (11/15)	26.67% (4/15)	53.33% (8/15)	6% (1/15)
Control	28.47% (4/14)	61.53% (10/14)	21.42% (3/14)	

^aPre-post standardized mean difference represents an improvement in performance

^bPre-post standardized mean difference represents an improvement of at least 0.64 SD
