Shared ImmunoChip Control Cohorts

We thank the Rheumatoid Arthritis Consortium International (RACI) for Netherlands, Spanish, Swedish, UK and US ImmunoChip control genotypes. This study makes use of data generated by the Wellcome Trust Case-Control Consortium. A full list of the investigators who contributed to the generation of the data is available from www.wtccc.org.uk. Funding for the project was provided by the Wellcome Trust under award 076113 and 085475. Swedish control data was provided from EIRA study, Professor Lars Alfredsson, Department of Environmental Medicine, Karolinska Institutet, Stockholm, Sweden. Control data from the Netherlands was provided from the department of Rheumatology, Leiden University Medical Center, Leiden, The Netherlands.

Polish control data was provided by the Celiac Disease Consortium and Hungarian control data collected with the help of the Hungarian Research Fund (OTKA) grant K101788 was provided by Prof Ilma Korponay-Szabo, Celiac Disease Centre, Heim Pál Children's Hospital, Budapest and University of Debrecen, Debrecen Hungary.

We acknowledge the International MS Genetics Consortium for providing access to control sample data from Belgium, France, Norway, Italy and Germany. The collection and genotyping of these samples was made possible by: the Norwegian MS society and the Norwegian Bone Marrow Registry (Norwegian samples); the

French Biological Resource Center for MS Genetics, Genethon and INSERM (French samples); and a FISM (Italian Foundation for Multiple Sclerosis) grant (“Progetto Speciale Immunochip”) for Italian samples.

Italian samples were collected by Prof. Sandra D'Alfonso (Interdisciplinary Research Center of Autoimmune Diseases IRCAD, University of Eastern Piedmont, Novara, Italy; PROGEMUS Consortium) and Dr. Martinelli Boneschi (Laboratory of Genetics of Complex Neurological Disorders, Division of Neuroscience & INSPE, San Raffaele Scientific Institute, Milan, Italy; PROGRESSO Consortium); funding was provided by a FISM (Italian Foundation for Multiple Sclerosis) grant (“Progetto Speciale Immunochip”). The KORA study was initiated and financed by the Helmholtz Zentrum München – German Research Center for Environmental Health, which is funded by the German Federal Ministry of Education and Research (BMBF) and by the State of Bavaria. Furthermore, KORA research was supported within the Munich Center of Health Sciences (MC-Health), Ludwig-Maximilians-Universität, as part of LMUinnovativ.
