

Supplementary figure:
 Evolution of the viral load in patients after the CMVIG therapy.
 For each patient, the x axis shows the days since the HSCT and the y axis shows the logarithm of the viral load. The black arrow indicates the start of the CMVIG therapy; other treatments are also indicated. The black bars at the bottom of each graph indicate reactivations in patients with recurrent CMV. *FOS*: foscarnet; *GAN*: ganciclovir; *VAL*: valganciclovir; *CID*: cidofovir; *CTLs*: CMV specific cytotoxic T lymphocytes.
