

Development of cancer surveillance guidelines in Ataxia Telangiectasia: A Delphi-based consensus survey of international experts

Supplementary file 1

The Delphi questionnaire will consist of 6 questions with different formats.

The results collected on this round will be provided in the next round.

Question 1

Do you agree with the following statement: "Evidence-based guidelines for cancer surveillance in people with A-T are required" <i>*Required</i>							
	Strongly disagree	Disagree	Somewhat disagree	Neither agree nor disagree	Somewhat agree	Agree	Strongly agree
Level of agreement							
Are there any suggestions you have for amending this statement? <i>Optional</i>							

Question 2

<p>We are conducting a feasibility trial of whole body MRI for cancer detection in people with AT. If this is successful, we hope to conduct a prospective trial of cancer screening in A-T, which will contribute to the development of evidence-based guideline. What other tests do you think should be included in a cancer surveillance programme in A-T? <i>*Required</i></p>

	Full blood count and blood film
	Liver function tests
	Alpha fetoprotein
	Beta Human Chorionic Gonadotrophin
	Lactate Dehydrogenase
	Epstein-Barr Virus
	I do not feel able to answer this question
	Other
Please specify	

Question 3

<i>Based on your experience of caring for people with A-T, what do you think the optimum interval for performing screening test would be? *Required</i>	
	6 months
	1 year
	2 years
	3 years
	5 years
	I do not feel able to answer this question
	Other – please specify

Question 4

<i>Do you think that screening intervals would need to be different between children and adults with A-T *Required</i>	
<input type="checkbox"/>	Yes
Please explain further	
<input type="checkbox"/>	No
Please explain further	
<input type="checkbox"/>	I do not feel able to answer this question

Question 5

<i>Based on your experience of caring for people with A-T, at what age do you think cancer screening should commence? *Required</i>	
<input type="checkbox"/>	Birth
<input type="checkbox"/>	From 2 years
<input type="checkbox"/>	From 3 years
<input type="checkbox"/>	From 5 years
<input type="checkbox"/>	From 10 years
<input type="checkbox"/>	I do not feel able to answer this question
<input type="checkbox"/>	Other – please specify

Question 6

<i>Do you think there should be an age at which cancer surveillance stops? *Required</i>
--

	Yes
	No
	I do not feel able to answer this question
Please state age and rationale	

Thank you!

Thank you for completing this first round. The data will now be analysed.

The next round will be sent out once the analysis is complete. The feedback from this round will be presented in the next round.
