

Identification is safety

Are you going to be admitted to hospital?
Do you need a test? Are you taking medication?

April
2019

Confirm that you have your **identification bracelet** or other identification system in place

Check that your **personal data is correct**

If it is removed or deteriorates, **ask for another**

Actively participate with the professionals when they ask you your name and date of birth

Before a test, intervention or transfer, **confirm your identity**

Do not remove the bracelet until hospital discharge

Remember:

Correct patient identification reduces the risk of complications due to errors during health care.

You are unique
