1. Supplemental Tables

Supplemental Table I. TaqMan probes used in the qRT-PCR.

Gene	Probe
BANP	Hs0099999904_m1
PDCD6IP	Hs00994345_m1
CAMK2G	Hs00968809_mH
E2F4	Hs00608098_m1
PPIA	Hs0099999904_m1

Supplemental Table II. Proportion of negative Z-score regarding the five neuropsychological domains adjusted by age and educational level. The neuropsychological tests were performed in five CADASIL patients from the validation cohort.

Percentage of negative Z-score

	Percentage of negative Z-score
Executive Function	80% (4/5)
Attention and Information Processing	60% (3/5)
Speed	
Motor Speed	60% (3/5)
Visuoconstructional Skills	20% (1/5)
Verbal Memory	60% (3/5)
Working Memory	60% (3/5)

Supplemental Table III. List of the GO terms enriched in the category of Biological Process.

ID	Description	Set Size	NES	p-value	p.adjust
GO:0006082	organic acid metabolic process	482	-1.47	1.01x10 ⁻³	8.49x10 ⁻²

NES: normalized enrichment score; p.adjust: adjusted p-value.

2. Supplemental Figures

Supplemental Figures I: Z-score regarding the five neuropsychological domains adjusted by age and educational level, evaluated in the five patients with available cognitive information.

EF: executive function; IPS: information processing speed; VCF: visuoconstructional function.

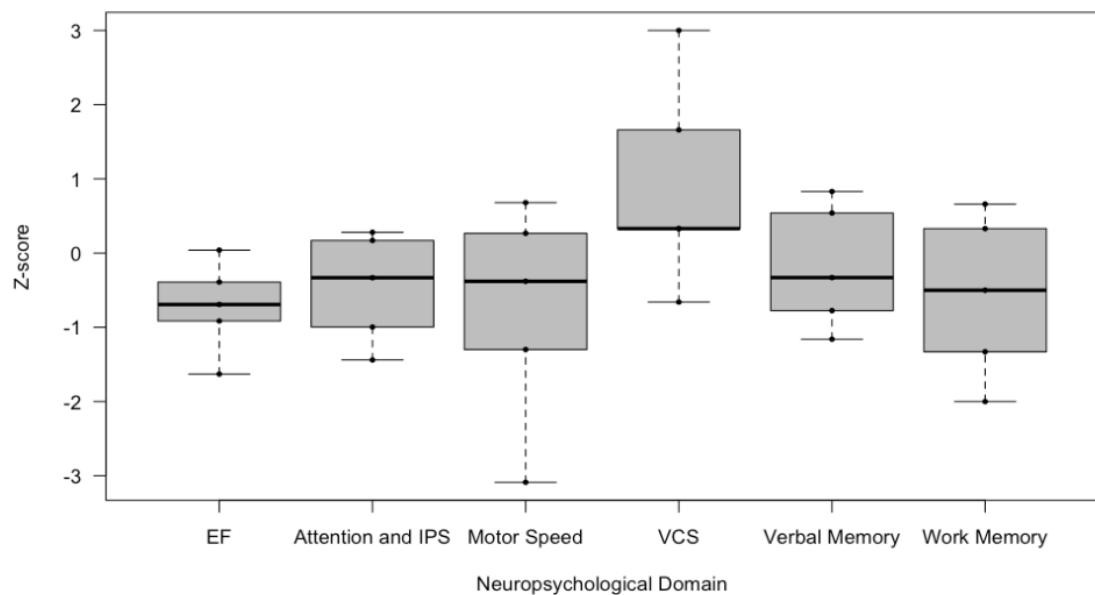

Supplemental Figure II. *E2F4* gene expression profile in decreasing order (GTEx Portal, <https://gtexportal.org/home/gene/E2F4>.

Supplemental Figure III. Single-Nuclei Brain RNA-seq expression of *E2F4*.

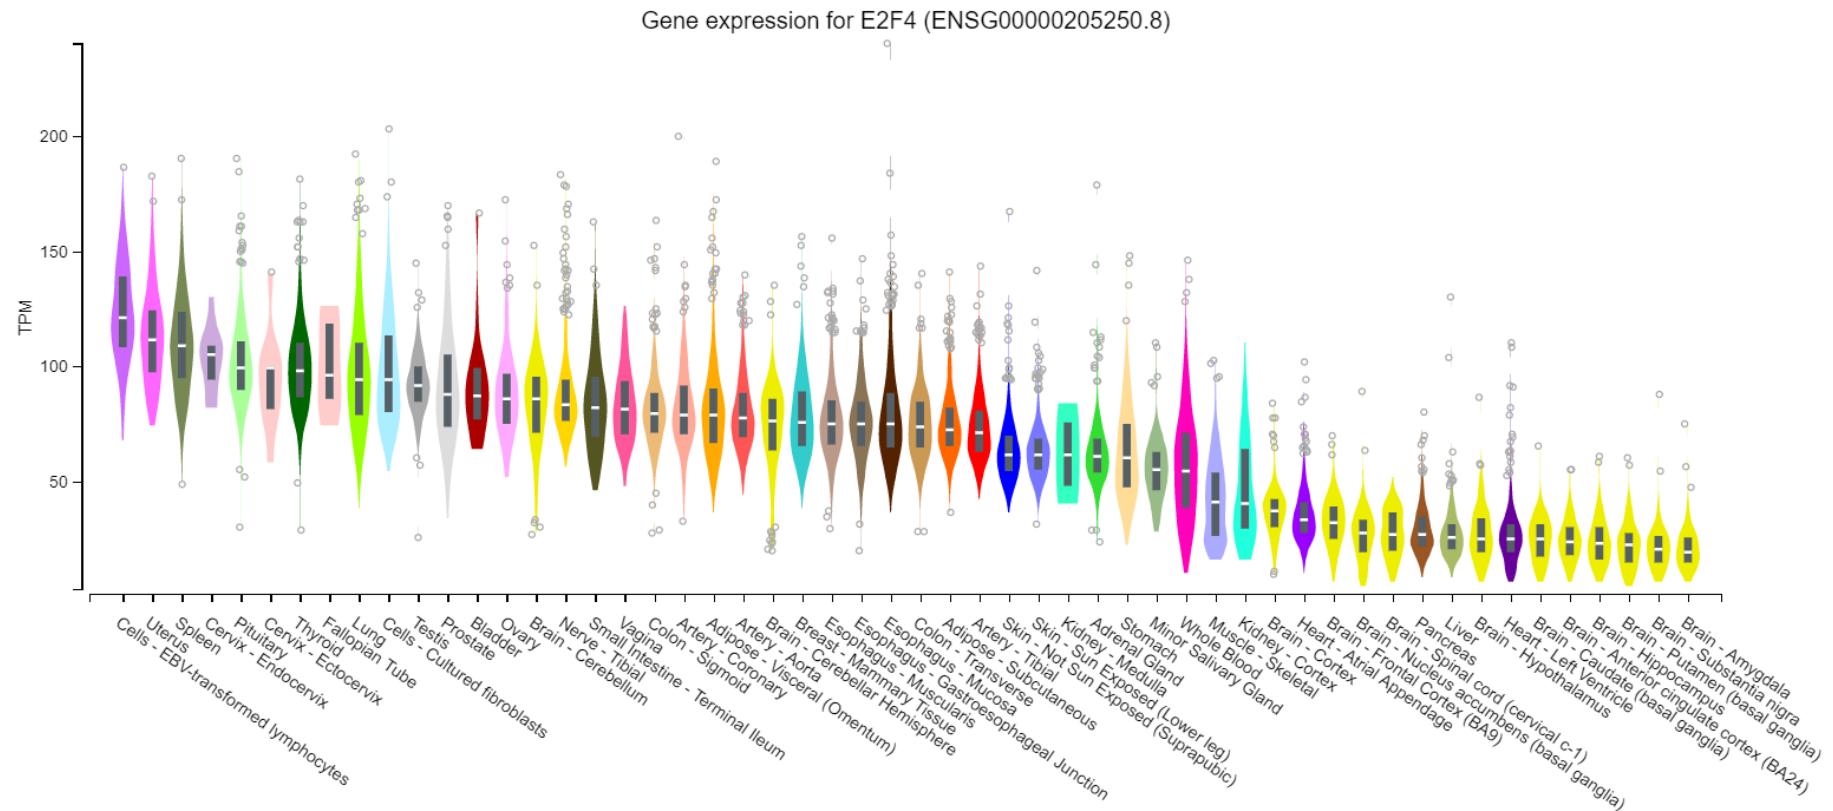

Supplemental Figure IV. Enrichment map (biological process) of the top 60 terms. This map groups gene ontology (GO) terms by similarity. Nodes are colored by p-value and their size reflects the number of genes found in that term.

Supplemental Figure V. Enrichment map (cellular components) of the top 60 terms. This map groups gene ontology (GO) terms by similarity. Nodes are colored by p-value and their size reflects the number of genes found in that term.
