

Supplementary material

Supplementary Figure S1. Proportions of PWE with worsening seizure frequency at Month 3, Month 6, Month 12 and the last visit in the early and late add-on subgroups for (A) Total seizures, (B) Focal seizures and (C) GTCS (Effectiveness population). GTCS, generalised tonic-clonic seizures

Supplementary Figure S2. Retention and effectiveness in the first and second add-on subgroups: (A) Retention rate (Retention Population) (B) Responder rate (total seizures; Effectiveness Population) and (C) Seizure freedom rate (total seizures; Effectiveness population). Response was defined as $\geq 50\%$ seizure frequency reduction from baseline. Seizure freedom was defined as no seizures since at least the prior visit. CI, confidence interval
